

CERTIFIED CENTRAL STERILE TECHNICIAN COURSE

Premier Central Services

Dear student

Welcome and thank you for enrolling into our hybrid Certified Central Sterile Technician training course at Premier Central Services!

As you may already know, hybrid courses provide amazing flexibility in allowing you to continue your education without traveling to campus several times per week. This can save you time, travel costs, and fit nicely into your already busy life. It is important to note, however, that these courses allow you to learn at your own pace.

It will be very helpful for you to be self-motivated and disciplined to ensure that your assignments and course requirements are completed.

We want you to start work ASAP!

Please take a moment to review the remainder of this letter to ensure you start off the semester on the right track!

Instructions

- Please **read through each chapter** from start to finish.
- Do not skip chapters** – information from previous chapters will help you better understand future chapters.
- After you have read through a chapter, take that specific **chapter test** and use the **answer key** to grade it.
- If you score anything less than 80% we recommend you read through that chapter and **re-test**.
- Read through the Power Point presentation** as you progress through each chapter.
- After you have completed all chapters, contact your instructor for a **final closing interview**.
- You will then be set up to **take the national exam** at the nearest Prometric facility.
- If you have any questions or concerns, please contact your personal instructor via email.

Good luck!
